Ekosistem Agriculture

XERPIUM AGRICULTURE adalah paket lengkap untuk bisnis pertanian dan perkebunan — dari Chart of Accounts khusus agribisnis, laporan keuangan sesuai standar pertanian, hingga dashboard panen, input cost, komoditas, dan buyer analytics.

l10n_id_agriculture

COA Template — Chart of accounts khusus agriculture & plantation

Code Digits — 6 digit account codes (standar Indonesia)

Account Groups — Struktur akun sesuai SAK pertanian

Receivable/Payable — ag_120100 (AR), ag_210100 (AP)

Income/Expense — ag_410100 (revenue), ag_510100 (COGS)

Tax Defaults — PPN 11% sale & purchase pre-configured

Currency Exchange — ag_710200 (gain), ag_720200 (loss)

Cash Difference — ag_710300 (income), ag_720300 (expense)

report_id_agriculture

Report Structure — Struktur laporan sesuai standar pertanian

Balance Sheet — Neraca dengan group asset biologis

P&L Statement — Laba rugi dengan COGS panen & input

Cash Flow — Arus kas operasional pertanian

Account Group Sync — Auto-sync account_group_ids dari COA template

XML Parsing — Parse vit_report_structure_agriculture.xml untuk mapping

Post Load Hook — _post_load_data sync saat chart template applied

vit_dashboard_agriculture

Dashboard Panen — KPI dashboard pertanian & perkebunan

8 KPI Tiles — Revenue, orders, input cost, AR, workers, stock value, PO pending, invoices

4 Charts — Monthly revenue, cost trend, top komoditas, top buyers

ORM Sources — sale_order, purchase_order, stock_quant, hr_employee, account_move

SQL Sources — Monthly revenue/cost trend, top products/buyers analytics

Filters — Global date filter, auto-apply, 5min refresh

Color Theme — Green untuk agribisnis

Grid Layout — 12-column responsive grid, y=0 to y=14

Dashboard Metrics

Total Revenue Panen — SUM(amount_total) from sale_order state=sale/done

Total Penjualan — COUNT sale_order transactions

Biaya Input — SUM purchase_order (pupuk, benih, pestisida)

Piutang Pembeli — SUM amount_residual from out_invoice unpaid

Tenaga Kerja — COUNT hr_employee active workers

Nilai Stok Hasil Panen — SUM stock_quant value at internal locations

PO Input Pending — COUNT purchase_order state=draft/sent/to approve

Invoice Bulan Ini — COUNT out_invoice this month

Accounting Agriculture

COA 6-Digit — ag_XXXXXX prefix untuk semua akun pertanian

Asset Biologis — Account group untuk asset tanaman & ternak

Biaya Panen — COGS panen terpisah dari COGS lain

Subsidi — Account untuk subsidi pupuk/benih pemerintah

Land Management — Account untuk biaya sewa/pajak lahan

Depreciation — Penyusutan alat pertanian & perkebunan

Journal Defaults — Sale & purchase journal with refund_sequence=True

Dashboard Analytics

Revenue per Komoditas — Top 10 produk pertanian by revenue

Monthly Trend — 12-month revenue & cost trend chart

Top Buyers — 10 pembeli terbesar (distributor, pasar, eksportir)

Worker Metrics — Jumlah pekerja aktif per departemen

Stock Valuation — Nilai stok hasil panen di gudang

Harvest Cycle — Tracking siklus panen per produk

Input Cost — Biaya pupuk, benih, pestisida per bulan

Financial Reports

Balance Sheet — Neraca dengan asset biologis (tanaman produktif/konsumtif)

P&L — Laba rugi dengan revenue panen & COGS input

Cash Flow — Arus kas operasional, investasi (lahan), financing

Harvest Report — Laporan hasil panen per periode

Input Report — Laporan pembelian input (pupuk, benih, dll)

Land Usage — Laporan penggunaan lahan per komoditas

📁 HR & Operations

Worker Management — Manajemen karyawan pertanian (tetap/musiman)

Payroll — Gaji harian/borongan untuk pekerja panen

Attendance — Absensi pekerja kebun/sawah

Department — Departemen per komoditas/lahan

Equipment — Tracking alat pertanian (traktor, sprayer, dll)

Calendar — Jadwal tanam, panen, aplikasi pupuk
