Animal Feed Industry Ecosystem

XERPIUM ANIMAL FEED is an ERP solution for the animal feed & feedmill industry — from raw material procurement (corn, soybean meal, premix), ration formulation, broiler/layer/ruminant/aquaculture feed production, quality control, distribution, to a KPI dashboard & 179 feedmill-specific COA accounts.

Bahan Baku & Procurement

Commodity — Corn, soybean meal, premix, rice bran, pollard, CPO, molasses, minerals, vitamins, additives

Purchase — Raw material PO with multi-supplier, long-term contracts, commodity prices

Stock — Multi-warehouse: corn silo, SBM warehouse, premix cold storage, finished feed warehouse

Quality — Moisture, protein, fat, fiber content — QC sampling at receiving

Production & Formulation

Ration Formulation — Nutrient composition per feed type (broiler/layer/ruminant/aquaculture)

BOM — Multi-level Bill of Materials: grinding → mixing → pelleting → cooling → bagging

Manufacturing — MO from formulation, work centers (grinding/pellet/bagging), QC at every stage

Costing — COGS per ton of feed, cost rollup from raw material + labor + overhead

Quality Control Lab

Raw Material QC — Moisture %, protein %, fat %, fiber %, ash % at receiving

In-Process QC — Particle size, mixing uniformity, pellet durability index

Finished Product — Final product analysis, nutrien composition guarantee

COS — Certificate of Analysis per batch, traceability lot number

Sales & Distribution

Product Categories — Broiler feed (starter/grower/finisher), layer, ruminant, aquaculture, premix

Sales Channel — Distributors, direct farmers, feed shops, modern trade, toll manufacturing

Customer — Distributor receivables, credit limit, due date, aging report

Delivery — DO, delivery note, fleet tracking to farmers/distributors

Feedmill Chart of Accounts

179 accounts specific to the animal feed industry — from corn inventory to factory expenses. Balance Sheet, P&L, Trial Balance per Indonesian GAAP (PSAK) with feed-specific fiscal positions.

Financial Reports

Balance Sheet — Current assets (raw material inventory, WIP, finished feed), fixed assets (grinding/pellet/bagging), liabilities, equity

Profit & Loss — Revenue per feed type (broiler/layer/ruminant/aquaculture), COGS per ton, operating expenses, gross profit

Trial Balance — All accounts with 6-digit codes — 32 account groups

Tax — 11% VAT, tax-exempt fiscal position for animal feed

Formula — Gross profit, operating profit, net profit — auto from report structure

14 KPI Widgets

Total Revenue — SUM amount_total SO confirmed/done

Total Orders — COUNT sale orders

Raw Material Costs — SUM of raw material POs

Distributor Receivables — Outstanding AR invoice

Stock Value — Stock value of all warehouses

Total Customers — COUNT active customers

Pending Material POs — COUNT draft/sent POs

Invoices This Month — COUNT posted invoices

Revenue Trend — 12-month area chart

Raw Material Cost — 12-month line chart

Top Products — Bar chart + list

Top Customers — Bar chart + list

Cross-Module Integration

Accounting — 179-account feedmill COA, 11% VAT, tax-exempt fiscal position

Inventory — Multi-warehouse: corn, SBM, premix, finished feed

Purchase — Raw material PO, contract, QC receiving

Manufacturing — MO from formulation, grinding/pellet/bagging work centers

Sales — Distribution to distributors/farmers/modern stores

Dashboard Studio — 14 KPI, AI auto-generate, NL→SQL

AI Assistant — Check stock, price, status via natural language
