Garment Management Ecosystem

XERPIUM GARMENT is a garment & apparel management solution — from garment-specific chart of accounts, BOM per style, production planning, cutting, sewing, finishing, to real-time KPI dashboards.

Chart of Account & Master Data

Chart of accounts specific to the garment industry with a 6-digit account structure. 100+ accounts covering garment assets, raw material inventory, WIP, production costs, and apparel revenue.

Chart of Account Garment

Code Digits — 6-digit structure (ga_XXXXX) specific to garment

Receivable — Garment trade receivables (ga_120100)

Payable — Garment trade payables (ga_210100)

Inventory — Raw material, WIP, finished goods accounts (ga_130100–130800)

Revenue — Apparel & toll manufacturing revenue (ga_430100)

Expense — Garment cost of goods manufactured (ga_510100)

Tax — PPN garment 11% (tax_sale_11 / tax_purchase_11)

Production & Inventory Accounts

Raw Material — Raw material inventory (ga_130100)

WIP — Work in process (ga_130200)

Finished Goods — Garment finished goods (ga_130300)

Consumable — Auxiliary materials & trims (ga_130600)

Asset Garment — Sewing, overlock, cutting machines (ga_170100)

Accum Depr — Garment asset accumulated depreciation (ga_170200)

Production Cost Accounts

Raw Material Cost — Direct raw materials (ga_510200)

Direct Labor — Direct labor wages (ga_510300)

Factory Overhead — Overhead, electricity, water, gas (ga_510400)

Trim Cost — Trim & accessory costs (ga_510500)

Toll Manufacturing Cost — Toll manufacturing service costs (ga_510600)

Subcontractor Cost — Subcontract costs (ga_510700)

Other Accounts

Freight — Garment shipping costs (ga_520200)

Commission — Garment sales commission (ga_520300)

Discount — Garment sales discount (ga_430200)

Sales Return — Sales returns (ga_430300)

Input VAT — Purchase VAT (ga_150200)

PPN Keluaran — Sales VAT (ga_250200)

☐ BOM per Style

BOM Garment — Bill of material per garment style, multi-level

Component — Fabric, trim, thread, label, packaging

Operations — Operation routing: cutting, sewing, finishing, packing

Cost Roll-Up — Cost calculation per garment unit

Scrap % — Allowance waste fabric per style

☐ Production Order

MO Garment — Garment-specific manufacturing order

Planning — Lot sizing per cutting batch

Component Release — Raw material issue to production

WIP Tracking — Real-time work-in-process tracking

Labour Hours — Working hours recording per operation

☐ Cutting & Sewing

Cutting Plan — Marker plan per lay fabric

Fabric Usage — Fabric usage tracking per cutting

Sewing Line — Allocation to production line per style

Bundle Tracking — Bundle from cutting to finishing

Defect Tracking — Defect notes per bundle/operation

☐ Quality Control

QC Checkpoint — Check quality per operation (cutting, sewing, finishing)

AQL Sampling — Acceptable Quality Level sampling

Defect Categories — Minor, major, critical with action plan

Repair Order — Repair order for defective goods

QC Pass Rate — % pass rate per style/line/operator

Dashboard KPI Garment

Prebuilt KPI dashboard for garment manufacturing & apparel business, integrated with sales, purchase, stock, MRP, and accounting.

Production KPIs

Daily Output — Units produced per day

Line Efficiency — % efficiency per sewing line

Downtime — Machine downtime per shift

Target vs Actual — Production target vs actual comparison

SMV — Standard Minute Value tracking

Financial KPIs

Cost per Unit — Production cost per garment unit

Gross Margin — Gross margin per style

WIP Value — WIP value in rupiah

Inventory Turn — Raw material & finished goods inventory turnover

Quality KPIs

Pass Rate — % passing QC per operation

Defect Rate — % defects per style/line

Rework Cost — Repair costs per period

Customer Return — % returns from buyers

Supply Chain KPIs

Lead Time — Procurement lead time bahan baku

Fabric Stock — Fabric stock per type

OTIF — On Time In Full delivery ke buyer

Supplier Score — Rating supplier fabric & trim

Garment ↔ Accounting

Garment-specific 6-digit COA (ga_XXXXX)

Separate WIP, raw material, finished goods accounts

Automatic production cost journal from MO

Garment ↔ Inventory

Raw material inventory per fabric type

WIP tracking in stock location

Finished goods from production → finished goods

Garment ↔ Manufacturing

Multi-level BOM per style

Routing cutting, sewing, finishing

Toll manufacturing subcontracting

Garment ↔ Dashboard

Integrated garment KPI dashboard

Production, quality, finance widgets

Drill-down to source document

Garment ↔ Purchase

Raw material PO from BOM requirement

PO for trims & accessories

Supplier fabric & trim management

Garment ↔ HR

Operator working hours recording

Payroll based on output per line

Attendance per production shift
